

Pressrelease FOR IMMEDIATE RELEASE

Dortmund, September 16th 2014

Go for glory with the Champions League Predictor app!

The UEFA Champions League - the most exciting and glamorous club football competition in the world - is about to start again for the 2014/15 season. Can Ronaldo lead Real Madrid to defend their title? Can Chelsea, Manchester City or Liverpool snatch the cup for Premier League? Will this be the year the Bayern Munich or Borussia Dortmund reestablish German [Bundesliga](#) dominance or will La Liga or [Serie A](#) reawaken past glories?

The only thing as exciting as watching the Champions League is playing along with it and predicting the results with friends and proving you know the most about the competition, teams and players - [Champions League Predictor](#) is the app that lets you do just that!

Download now for free from the Apple iTunes Store - [Champions League Predictor](#) from triomis - is available for iPad, iPhone or iPod Touch and any device running iOS 6 or later. Players can not only predict the results of matches but also get the latest goal alerts, news about the tournament and teams, download football wallpapers, ringtones and compare their scores with players from their country or all over the world!

[Champions League Predictor](#) is also available for [Android smartphones](#) and tablets, [Windows smartphones](#) and devices running [Windows 8](#). Users can play against friends and other users no matter what device they are using. Another unique feature of [Champions League Predictor](#) is that users can invite others using any of these compatible devices.

The rules of [Champions League Predictor](#) are simple - the player predicts what they think the final score will be and then waits for the final

result. A 100% correct score prediction and result gives the player three points, a correct result or draw gives one point. Players earn 100 'triomen' - in game currency - for every point they earn which can be spent on downloadable content or new predictions.

Andreas Thurek, CTO of triomis said: "We are excited that we can provide our [Champions League Predictor](#) for Apple devices! We have taken our experience and knowledge of building apps for other platforms like Windows Phone and Android and can bring that excellence to the iTunes store."
